We would like you to experience the warmth and friendliness of our office and the courteous service that we provide. Our mission is to help you achieve your best dental care possible! Scaling, polishing and root planing is our everyday routine and goal. Gum disease or periodontal disease can cause more than just bad breath, it can cause tooth loss and the loss of precious bone and tissue, sometimes without symptoms. Left untreated, it will only progress and it can cause health problems, like heart disease and stroke. Wednesday, December 24, 2009 I often get asked by new patients what I like best about my work. It is a difficult question to answer because I love everything about my work but I'll share my favorites with you. I have been doing the same procedures for 25 years. I have learned the importance of conserving the tooth structure, patient education and being a good listener. The best part of my job is talking to the patients and listening to their story. It's amazing how even though we all

have common problems, each person's story is different and fascinating. Last year, I was contacted by a new patient who wanted to get some cosmetic teeth work. Her smile was amazing and I was honored to help her achieve her beautiful smile. Here is a picture from before and after. 1 comment: Odd that you should mention talking with patients. My oral practice is going through a recession also. At the moment I am talking about my clients to try and see if it will be possible to do some work for them. I have a practice in the south with 15 years experience and a very good reputation. I hope it does not go the way of the Australian practice. I would like to make a point of actually seeing my patients. I have a very large practice and I have seen most of them first hand. It is very nice to hear from a colleague in the United States who is having the same problem. For some reason, many of the South African practices have been closing over the past few years. Although there are a few good practices in the country, there are very few dentists with a long record of patient care. I would be curious to know how long you have been in practice and how many years you have been doing this type of cosmetic work. I am willing to help you out if you want to discuss this issue over the phone. I am always willing to hear 82157476af
